High quality of vacuum packaging and convenient operation process

Vacuum packaging machines are easy to use and have long operation life.

Purpose

- vacuum packaging of banknotes and securities in polyethylene bags

Advantages

- extremely secure hydraulic lid fixers
- reliable vacuum pumps (made in Europe)
- body manufactured from alloy-treated steel
- heavy-duty acrylic glass lid
- wear-proof Teflon band
- no need to adjust hooked-up plates
- safe cliché fixation, avoiding its displacement
- cliché is made of heavy-duty rubber with high durability
- express cliché change
- comfortable control panel

Features

- bank details engraved on the seal
- adjustable heating, vacuum depth and temperature

Specifications			
	Number of packages packed together, pcs/cycle	2	
	Packing speed, packages/min	6-8	
	Vacuum pump performance, m³/h	10	
	Chamber dimensions, mm	465x285x128	
	Sealing joint length, mm	442	
	Cliche´ length, mm	434	
	Package thickness, microns	0,06-0,18	
	Power consumption, W	550	
	Power supply, V/Hz	220 /50	
	Net weight, kg	62	
	Overall dimensions, mm	535x405x400
